

Flagship driver

A high-intent iPhone Search build designed for controlled volume

PORTFOLIO EXERCISE - NOT CLIENT WORK

QUESTION

How can a flagship-product campaign capture demand without surrendering routing and budget control?

DECISION

Build Search directly, align product assets to landing pages, and keep the demonstration campaign paused.

EVIDENCE RETAINED

Campaign setup, sitelink structure, responsive ad copy, and final launch-state verification.

VALIDATION

Review query quality, asset-to-page consistency, conversion integrity, and CPA before bidding changes.

SECTION 1

Goal Selection & Campaign Type Definition

Establishing the foundational settings of the campaign. I built it without a guided template to keep full control over the settings and bidding structure.

The screenshot displays the Google Ads campaign setup interface. It is divided into several sections:

- What's your campaign objective?**
 - Choose your objective**
 - Select an objective to tailor your experience to the goals and settings that will work best for your campaign.
 - Options: Sales, Leads, Website traffic, App promotion, YouTube reach, views, and engagements, Local store visits and promotions, and **Create a campaign without guidance** (selected).
- Select a campaign type**
 - Options: Performance Max, **Search** (selected), Demand Gen, Display, Shopping, Video, and App.
- Campaign name**
 - Text input: US - Search - iPhone Flagship Driver
- Select the results you want to get from this campaign**
 - ☒ Website visits
 - Text input: <https://www.apple.com>
 - ☐ Phone calls

At the bottom right, there are "Cancel" and "Continue" buttons.

Fig. 1: Objective selection showing 'Create a campaign without guidance,' the Search campaign type, campaign name 'US - Search - iPhone Flagship Driver,' and Website visits enabled for apple.com.

BEHIND THE STRATEGY

Shop iPhone 17 Pro
https://www.apple.com/shop/buy-iphone/iphone-17-pro

Sitelink text: Shop iPhone 17 Pro

Description line 1 (recommended): Powerhouse A19 Pro chip

Description line 2 (recommended): Professional pro-grade camera.

Final URL: https://www.apple.com/shop/buy-iphone/iphone-17-pro

Explore iPhone 17 Air
https://www.apple.com/iphone-17-air

Sitelink text: Explore iPhone 17 Air

Description line 1 (recommended): Our thinnest iPhone design ever

Description line 2 (recommended): Engineered for easy portability

Final URL: https://www.apple.com/iphone-17-air

Shop iPhone 17
https://www.apple.com/shop/buy-iphone/iphone-17

Sitelink text: Shop iPhone 17

Description line 1 (recommended): Our advanced 6.3-inch display

Description line 2 (recommended): Powered by the fast A19 chip

Final URL: https://www.apple.com/shop/buy-iphone/iphone-17

iPhone 17 Pro Max

Sitelink text: iPhone 17 Pro Max

Description line 1 (recommended): Ultimate 5x zoom camera system

Description line 2 (recommended): Our longest lasting battery life

Final URL:

Apple Trade In
https://www.apple.com/shop/trade-in

Sitelink text: Apple Trade In

Description line 1 (recommended): Trade in your current device

Description line 2 (recommended): Get credit toward an iPhone 17

Final URL: https://www.apple.com/shop/trade-in

Compare iPhone Models
https://www.apple.com/iphone/compare/

Sitelink text: Compare iPhone Models

Description line 1 (recommended): See the full iPhone 17 specs

Description line 2 (recommended): Compare against older models

Final URL: https://www.apple.com/iphone/compare/

Responsive Search Ad Copy: Headlines

Crafting engaging, relevant headlines that align closely with the target keywords to earn an “Excellent” Ad Strength rating.

Fig. 6: Headline inputs including 'Official Apple iPhone 17,' 'Buy iPhone 17 Online,' 'iPhone 17 Pro & Pro Max,' and 'The All-New iPhone 17,' with Ad Strength rated Excellent.

BEHIND THE STRATEGY

I worked the exact target keywords into the first few headlines, giving Google's automated testing more strong combinations and keeping the search query mirrored in the ad copy, while avoiding repetitive titles and vague CTAs. Every headline carries its own value proposition, whether that's financing, the new chip, design, or a direct buying prompt.

SECTION 10

Responsive Search Ad Copy: Descriptions & Active Assets

Completing the ad build by pairing the headlines with description copy, trade-in details, and service callouts.

BEHIND THE STRATEGY

I paired the headlines with descriptions covering financing, trade-in credit, and delivery speed, the kinds of details that tend to tip a comparison shopper into clicking, and made sure no optional asset field was left blank, since skipping description variations or callouts lowers the ad's quality signals. Callouts like “Free 2-Day Delivery” and “Flexible Payment Plans” sit near the top of the ad, so the offer is visible before someone even taps through. The headline screenshot above already demonstrates the ad copy itself; this step layers supporting detail rather than a new decision.

SECTION 11

Campaign Launch Verification

Finalizing the build on the live dashboard.

Fig. 8: Campaign Overview dashboard showing the paused status alongside a clean €0.00 spend graph.

BEHIND THE STRATEGY

The campaign is kept in Paused status since this is a portfolio build rather than a live account, so there's no reason for it to spend real budget while it sits here for review.

SECTION 14
