DATE Current Cycle

01 Executive Methodology & Experiment Hypothesis

CAMPAIGN SCOPE

US - Search - iPhone Flagship Driver (RSA headlines, descriptions, sitelinks, and callout extensions in scope)

CORE HYPOTHESIS

For non-brand switcher audiences (users considering moving from Android to iOS), ad copy focusing on **zero-friction data transfer and switching simplicity (Concept B)** will yield higher CVR and lower CPA than standard price anchoring (Concept A).

TARGET THRESHOLDS

Min. 2,000 clicks per variant · CTR uplift > 15% · CVR uplift > 10% at 95% statistical confidence.

02 Creative Asset Variant Matrix full data table · 5 headlines · 2 descriptions

ASSET TYPE	COPY VARIANT	CONCEPT GROUP	AD STRENGTH CONTRIBUTION
Headline 1 (Pinned #1)	Official Apple Store — Fast Free Shipping	CONTROL · A	High Relevance (Brand)
Headline 2	Switch to iPhone Effortlessly — Move in 1-Click	VARIANT · B	High CVR Driver
Headline 3	Get Up to \$250 Instant Trade-In Credit	VARIANT · B	High CTR Driver
Headline 4	Powered by A19 Bionic — Unmatched Performance	CONTROL · A	Feature Anchor
Headline 5	Transfer Photos & Contacts Instantly	VARIANT · B	Switcher Incentive
Description 1	Transfer your Android files, photos, and settings instantly with the Move to iOS app.	VARIANT · B	Frictionless Migration CTA
Description 2	Get zero-percent financing and fast, free delivery on all models at Apple.	CONTROL · A	Value Anchor

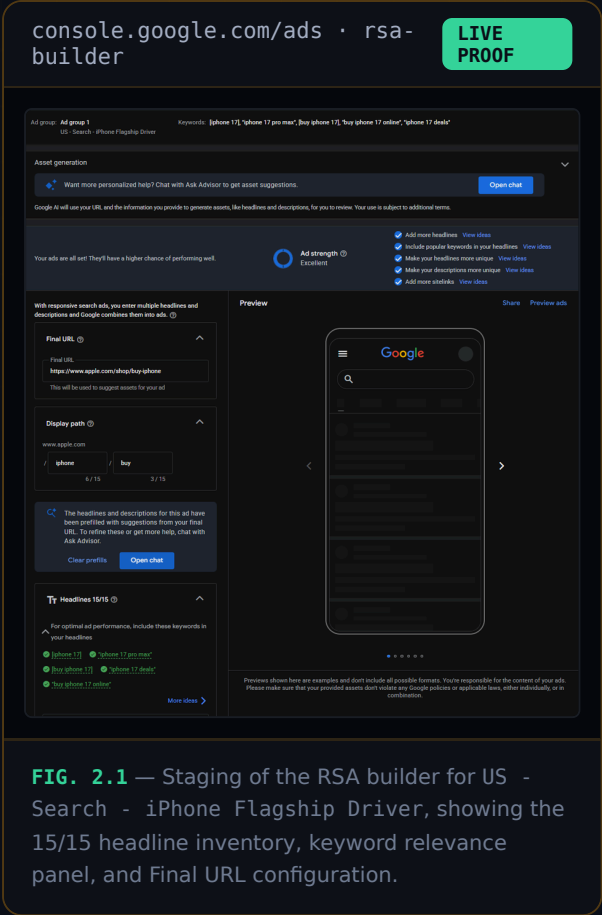

FIG. 2.1 — Staging of the RSA builder for US - Search - iPhone Flagship Driver, showing the 15/15 headline inventory, keyword relevance panel, and Final URL configuration.

TECHNICAL AUDIT NOTE

Achieved maximum Google **Ad Strength** rating ("**Excellent**") by fulfilling:

- High keyword relevance across [iphone 17] and "buy iphone 17 online"
- Full headline uniqueness across both Concept A and Concept B variant groups
- Maximum asset volume: 15/15 headlines, 4/4 descriptions
- Dynamic sitelink extensions layered on top of the core asset group

split-test-results.log · governance-action-matrix

DECISION TREE

STATISTICAL SIGNIFICANCE EVALUATION (95% confidence interval · 2,000 clicks min. · CPA/ROAS monitored downstream)

30-DAY SPLIT TEST RESULTS

└ Concept A (Control — Price Anchor) 4.1% CTR · 2.8% CVR · \$142 CPA

└ Concept B (Challenger — Switcher) 5.8% CTR · 4.2% CVR · \$95 CPA ★ WINNER

GOVERNANCE & ACTION MATRIX (promotion gated on CTR + CVR uplift, while monitoring downstream CPA and ROAS)

└ **IF VARIANT B WINNER** (CTR uplift > 15% AND CVR uplift > 10% AND CPA holds or improves)

└ ACTION: Scale Concept B headlines across all non-brand switcher campaigns; reallocate 80% daily budget; update PMax asset groups.

└ **IF INCONCLUSIVE** (CTR / CVR delta < 3%)

└ ACTION: Retain Concept B value proposition; test alternate CTAs ("Calculate Trade-In" vs. "Claim Credit").

└ **IF CONTROL WINNER** or CTR/CVR gains erode CPA/ROAS

└ ACTION: Revert to ecosystem authority messaging; test price anchoring exclusively via Promotion Extensions.
